PUBLIC WORKS

Project: Sewer Contract 33 - River Pines Area Phase II
Location: River Pines Area
Contact Person: Pablo Noguera, Engineering Division

This construction contract in the River Pines Area was awarded to Roads Corporation in 2004. Following is a locus map of the project area:

The scope of work included the construction of approximately 6.9 miles of 8" diameter sewers in Town roads and easements; about 1.1 miles of low pressure sewer; about 300' of 6" water main; about 0.3 miles of force main sewers; and all work incidental thereto, including, but not limited to excavation, placement of manholes, pipe, service stubs, and restoration of the work area including backfilling, loam, seeding, gravel placement, trench patching of roadway, etc.

Also, approximately 1,550' of gravity sewer on Republic Road and Esquire Road was installed. As a change order to this contract, a sewage grinder chamber, including structures and equipment, was installed at the Middlesex Sheriff's Office House of Corrections Facility.

The work was completed in the summer of 2007.
