

DEPARTMENT OF
PUBLIC WORKS

Project: East Billerica Sewer Extension
Contract 34B
Contact Person: Pablo Noguera, Engineering Division

Sewer Contract 34B is currently in the final design phase. The sewer route was carefully selected by the Town to avoid the need for pumping stations and make use of an existing MBTA railroad crossing constructed under a previous contract. We are currently working on the local permitting requirements for the project through the Board of Health and Conservation Commission. Easements will be required. The schedule for construction will be determined as Town Meeting funding allows.

The map below shows the approximate limits of the project:

The roads to be sewered in this contract are as follows:

Salem Road (Richards Street to Eastgate Road), Andover Road (Governor Carver Road to MBTA Tracks), Harvard Road, Belmont Road, Stafford Lane, Georgiana Road, Staple Street, Ross Road, Demolay Court, Ketchen Avenue, Captain Gookin Avenue, TowPath Road, Kara Lane, Governor Carver Road, Governor Fuller Road, Governor Peabody, Gray Street, Emerson Road, Jamieson Road, Carley Way, Senna Terrace, Patten Road, and West Running Brook Road.

This project will install approximately 28,000 feet of sewer at an estimated cost of \$9 million.
